

models are not provided with key locks. Remove tape from dial, turn dial to the right until it stops. Follow above instruction.)

Always count the number of times the number passes the opening index, not the number of revolutions you turn the dial.

1. Turn the dial counterclockwise (left) at least four times and stop on **59** at the opening index.
2. Turn the dial clockwise (right) stopping on **93** the third time you see this number at the opening index.
3. Turn the dial counterclockwise (left) stopping on **34** the second time you see this number at the opening index.
4. Turn the dial clockwise (right) until the dial completely stops at about **87**. You will feel some resistance about **97**, keep turning until the dial completely stops. Turn the safe handle clockwise to retract the locking pins.

To lock your safe your pins must be fully extended. The dial must be turned counterclockwise at least four times to completely scramble your combination. If you experience any problems or have any questions please contact your dealer.
